**Technical
Report**

ECMA TR/110

1st Edition / June 2021

**Recommendations and
best practices for**

- Git as single source of truth

- Produce & maintain machine-readable source

- Structured to include normative & Annex/non-normative (such as retired/archived keys)

- CD/GH Actions to generate *Draft* TR with every merge to draft branch

- Quarterly or semiannual publication of document generated by CD (merge draft to main)

- Mirror to Git service in Switzerland

TC55's first TG?

Programme of work to define and then follow process
